ENVIRONMENT POLICY

Brownfield Engineering and Maintenance Pty Ltd & subsidiaries is committed to conducting all its operations in an environmentally responsible manner and to minimising risks associated with our activities which may impact on the environment.

It is our policy to plan, manage and continually improve our activities so as to minimise disturbance or other adverse effects on the natural, cultural or community environments in which we operate. To fulfil the aims of this policy and support its full implementation, we will conduct our activities to ensure:

- Compliance with all environmental standards and regulations applicable to our operations.
- Ensure operations minimise hazards to the health, well-being of the community, personnel, and native flora and fauna.
- Avoid pollution or unnecessary disturbance of the natural environment including land, air, and water.
- Avoid disturbance to known sites of archaeological, cultural, natural or scientific significance.
- Manage our operations so as not to prejudice the interests of other legitimate land users.
- Ensure that all employees and sub-contractors are aware of their environmental responsibilities through inductions and other information and training.
- Monitoring of compliance with this policy and all environmental codes of practice.

Environmental management means conducting our operations with a continuing awareness of the potential for environmental impact, and acting to control and minimise this impact.
